Voice chat allows you to speak to other players in Overwatch with a connected microphone. Voice chat is enabled and set to push to talk by default. If you're having problems with voice chat, check our troubleshooting article ([/browser?](#)

[url=https%3A%2F%2Fus.battle.net%2Fsupport%2Farticle%2F31694](https://us.battle.net/support/en/article/31694)

Note: You can change the push to talk key for PC in the **Controls** menu.

Voice Chat Channels

When you join a game, you are automatically placed in the **Team Voice Chat** channel, or **Group Voice Chat** if you're grouped up with other players. You can switch between these channels by opening the **Social Menu Channels** screen (**P** by default) and selecting the headphone icon next to the desired channel. You can also quickly switch to Team Voice Chat if you're grouped with other players by clicking the blue **Join Team Chat** button on the hero select screen.
